**Abstract.** Bullying is an act of violence carried out by a person or group of people intentionally against people who are consider weaker. As we know in every country there must be every citizen has experienced cases of bullying that. For example, in America bullying is a common thing, which can found anywhere, so it is not surprising that there are many rumors circulating about bullying carried out by the local community. As we know there are various reasons why someone does bullying is because of differences and also religion. One of the popular of bullying in america is because the differents of religion and it happen to muslim in america. Muslim come to America occurred at 17th century with the arrival of slaves from Africa. Being a Muslim in America is not easy, there are many things that make them feel uncomfortable when outside the home, this is because many Americans do not like the presence of Muslims there. Some of them even felt that leaving the house was something scary; they said that after the events of 9/11 their views on Islam were very much different. Compared to other countries, and Muslims in America are one of the targets of their bullying. ). Like many cases that have been widely reported, many Muslims are bully while at school, campus or even in public places. There are also many effects they feel and it makes them feel insecure, uncomfortable and feel isolated. There are also many impacts of occur on victims of bullying, which will actually interfere with the lives of the victims, usually, victims of bullying will feel inappropriate to do anything and become insecure in public.
